BIOLOGY EXPERIMENT — In the picture on the left are Peter Farrington (left) and Warren Sessions; in the right-hand photo is Vickie Wentworth. These students are doing an experiment in Biology which consists of one tin can with holes around the top and one end cut out. Also they have a test tube with water, and a thermometer to take the temperature of the water after burning the peanut or walnut. The reason for the experiment is to determine how many calories certain foods contain. (by Carolyn Hall)

Remember, ladies, when you used to play house? Well, little girls are still doing it. Only today they've got more toy electric appliances. In 15 years this young lady will demand a lot more work-saving electricity...twice as much...than the average housewife uses today.

Like Mom, she'll expect the power to be there when she needs it. And like Mom she won't have to worry about where it comes from or the problems of getting it to her.

It will be there. Because Central Maine Power Company is already making plans for her electric future — the day "it'll be for real."

GREENWOOD CITY

Mrs. Colista Morgan, Corres.
Yesterday, with a change to sunshine I hurried to get my washing out then to visit the out-of-doors for a time.

I went to the pond where my boat is drawn up turned against a tree, and tethered where it will rest for the winter. Although the rains have been steady and long the pond hasn't risen swiftly. It is high however, and looked so inviting but I walked away listening to the gurgle. This reminded me of the toy water wheels which my brothers used to make and set at various places in our brook by the garden when we were all at home. It was fun then just to see them turn and to hear the "plunk-plunk" up and down the brook. Their voices differed so we could tell one from another.

I moved on down the road avoiding the woods at this season.

The shadows lay in the valley as the sun topped the mountain's crest.

The leaves clogged the gutters and choked the brooks as they floated down stream, later to wither and dry and quietly return richness to the earth.

Blue jays in their snug vests, double chins, and immaculate dress screamed their indignation criticizing my right to be there. They sounded somewhat like a party with horns rasping and tooting as they flew from tree to tree dipping, planning, and stopping in the branches.

He is called "planter of the oak forest" because of his fondness for acorns, hiding them in various spots without retrieving them.

Looking across the water I was surprised to see the blue heron. I presumed he had left. His great wings flopped slowly between glides. Its long body with legs straight out behind was conspicuous against the brown of the grasses. It settled down and waited, hoping.

The pines in the background cast restless shadows and the grasses moved changing with the glow of the sun and the flow of the clouds. These grasses now stand out as do the pines and birches clear and clean.

Arriving home I filled my feeders and was greeted by my congregation just outside my window. Each was eager to be first in my hand, my dish, or the feeder. Unafraid they twittered their, "Dee-dee-dee."

Watching me from the tree was my acrobat, the nuthatch. Clinging there, his stubby tail pointed to the sky he walked down keeping his beady black eyes on me uttering his nasal, "Up-up-up" telling me to move. I did and watched him from inside as he took his turn at the sunflower seeds, suet, or crumbs.

A flutter on the wall, a tiny "peenk" and I knew hairy woodpecker was about to peek around the corner and in the window. He is very shy so usually peeks several times to see if all is safe before he lights on the feeder.

So our fall has ebbed away and shortly we'll face the unseen winds, the frozen ground, ice on the pond, starry nights, snow, and shorter days. But there will be things that

November 15, was "Ingathering Mystery" Sabbath in the Seventh-day Adventist Mission Service. It was revealed that around \$850.00 had already been received toward a goal of \$2,000.00. There was a good attendance at Young People's Meeting on Friday evening, Nov. 14. A symposium on the life of a pioneer worker, Arthur G. Daniels, had been prepared by the leader, Cynthia Bowen. Those taking part in the program were: Timothy Joy, Violet Bowen, Marjorie Gleason, Lyle Wiggins and Pamela Benson. Other features were, a vocal selection by Marcia Wakem and scripture reading and prayer by Calvin Mason.

November 22 marks the beginning of the World-Wide Bible Reading program for all churches. Bible Society booklets carry the reading assignments to December 25. Why limit the reading of the Bible to then? Many people think the Bible has no relevance to today. On the contrary, much that is happening in the world is fully described in Bible prophecies. "Good news for Modern Man," the New Testament translated into the language of today and produced by the American Bible Society, does much to bring out the eternal worth of the "best seller" of all ages.

LIONS MET NOV. 12**AT CASCO COMMUNITY ROOM**

The Bethel Lions Club met on Wednesday evening, Nov. 12, at the Casco Bank Community Room. The meeting was presided over by Gene Buswell, president, and attended by Sam Bigelow, Syl LeClair, Eldon Greenleaf, Jay Willard and Ted Grover.

It was noted at this meeting that as of about a year ago, this club was operating, as many were in the red but today the club has a healthy reserve. Since the opening of school this September, the Bethel Lions Club has authorized the eye examinations and glasses, if needed, for five local needy cases. This is one of the major uses of Lions Clubs monies throughout the country.

The next meeting will be a Christmas party for members and wives at the Grovers house, Dec. 10.
